Todo App – JAN 2025

I made this app for real use by myself to store different things that I want to do while I'm developing, firstly I followed a tutorial and after that i added others features like the sidebar and others and I think how to code them by myself

Features :

Sidebar to select tasklists - Dark mode - Fullstack - Full Authentication

My Portfolio – SEP 2024

I made it as you see as a fullstack portfolio which lets me add new projects through a form, edit and delete it, I made multi-language using next-intl library, I made the dark mode and authentication to let my self sign-in and be the only one who can add projects

Features :

 Fullstack - Dark mode - Multi-language by next-intl
